

5 GAME ROUND SEQUENCE		
6 Planning Phase		
1) Ability Point Generation	2) Generate Pass Token	3) Determine Initiative
7 Activation Phase		
1) Activate Groups Players alternate activating Groups in initiative order or using a pass token <i>Sequence: Group Order>Move>Attack>Launch</i>		
2) Activate Dropsites Players alternate activating Dropsites they control before the next proceeding to next player in Initiative order		
3) Activate dropped Features Players alternate activating dropped Features in Initiative order		
8 Asset Phase		
1) Battalion Combat Players in Initiative order declare combat option for their Battalions at each Dropsite. • Dropsite to Single Feature • Dropsite to Dropsite • within Feature Then remove Battalions equally until a single players Battalions remains or none remain.		
2) Boarding Actions Battalion Carriers that did not Launch may use a chosen Asset that deploys Battalions to remove that many enemy Battalions from the ship Enemy Battalions remaining on Ships inflict Core hits equal to their amount. Ships destroyed this way do not roll for explosion and are worth twice their Kill Points		
3) Asset Combat <i>Sequence: Fighters>Bombers>Torpedoes</i> Player activates all Assets of the same type, all move then all simultaneously attack. Then proceed to the next player		
9 End Phase		
1) Repair For each ship with a repairable effect roll 1D6 for each repairable effect, on a 4+ remove a repairable effect		
2) Victory Points	3) Cleanup	

7.1 Order Summary					
Order	Turn	Move	Attack	Launch	Spike
General Quarters	Yes	Half to Full	Half Round Up	Yes	Remove Two
Silent Running	No	Half to Full	None	Yes*	Remove All
Weapons Free	No	Half to Full	Any	Yes	Add Two
Course Change	Begin & End	Up to Half	One	Yes*	Add One
Max Thrust	No	Full to Double	None	No	Add Two
Damage Control	Yes	Up to Half	1 Close Action	No	None

7.3 Attack Summary
1) Determine Potential Targets - Verify Formation Benefits 2) Assign Weapons to Targets 3) Roll to Hit - Target is Descent Ship in Atmosphere, Lock 6+ - Target is Non-Descent Ship in Atmosphere, reduce Lock by 1 - Escape Velocity treats Descent Ships as Non-Descent Ships - Bombardment... - Ignore penalties when Target in Atmosphere - Target is City, improve Lock by 2 - Target in Orbit from Orbit, Lock 6+ - cannot assign to Target in Orbit from Atmosphere - Verify other Special Rules (Air to Air, Close Action...) 4) Roll to Save (against Hits) - Check Fighter-Close Protection - Check other Special Rules (Aegis, Shield, Scald...) 5) Inflict Damage 6) Roll Crippling Effects (Capital Ships Only) 7) Roll Explosions (Capital Ships Only) • Range 3/6/9 • Only effects Ships in same layer • Heavy Ships add 1 to result • Colossal Ships add 2 to the result

7.4 Launch Summary
Fighters/Bombers/Torpedoes/Mines 6" Bulk Landers/Features 6" - Target Dropsite in any Layer. If enemy Battalion present need 2 Bulk Landers to place 1 Battalion Dropships 3" - Target Dropsite on same Layer as Carrier Boarding Pods 3" - Target Station or Ship on same Layer as Carrier Drop Pods 3" - Target Cities

7.3.6 Crippling Damage		
Result	Roll 2D6 for Effect	Reparable?
2-3	Energy Surge: Gain a Spike.	
4-5	Structural Damage: Suffer another point of damage.	
6	Fire: Gain a Fire Token. At the start of the End Phase, before the Repair step, this ship suffers a point of damage for each Fire Token it has.	4+
7	Defence Systems Offline: Gain a Defence Systems Offline Token. A Ship with a Defence Systems Offline token reduces its Energy, Kinetic, Backup, and Shield saves by 1, and may be targeted by enemy Ships as if their weapons had the Focused special rule, ignoring Formation Benefits if they do.	4+
8	Scanners Offline: Gain a Scanners Offline token, reducing this Ship's Scan to 1".	4+
9	Weapons Offline: Gain a Weapons Offline token, preventing this Ship from using Weapons or launching Assets.	4+
10	Navigation Offline: Gain a Navigation Offline token, reducing this Ship's total movement to 2" (regardless of Thrust) and preventing it from turning or changing Orbital Layer.	4+
11+	Orbital Decay: Gain an Orbital Decay token and falls into Atmosphere. Orbital Decay tokens prevent this Ship from moving from Atmosphere into Orbit.	6+

7.3.7 Explosion	
Result	Roll 1D6 for result
1	Burn Up: The exploding Ship is removed from play with no further effects.
2	Reactor Rupture: All Groups and Space Stations within double the explosion range gain a Spike.
3	Shredded: All Groups and Space Stations in explosion range suffer 2 Kinetic hits. Assets are removed on a 5+.
4	Fuel Detonation: All Groups and Space Stations in explosion range suffer 2 Energy hits. Assets are removed on a 4+.
5	Reactor Overload: All Groups and Space Stations in explosion range suffer 2 Core hits. Assets are removed on a 3+.
6	Foldspace Catastrophe: All Groups and Space Stations in explosion range suffer 2 damage and gain a Spike. Assets are removed on a 2+.

8.3 Asset Combat Summary
1) Activate Fighters - Move & Declare Wings - Attack Wings by removing Assets equally 2) Activate Bombers - Move & Declare Wings - Attack Groups or Stations - Verify Saturation Fire 3) Activate Torpedoes - Move - Attack Ships or Stations !) Mines - May Attack enemy Ships at end of Move if the Target Ship moves within Mine Thrust

10 SCENERY
10.1 Planetary Ring - Ignore Target's Spikes - Assets removed on 2+ 10.2 Micrometeor Cloud - Ignore Target's Spikes - Assets removed on 3+ - Ship suffers 2 Kinetic hits 10.3 Debris Fields - Ignore Target's Signature and Spikes - Assets removed on 5 - Ship suffers 2 Core hits 10.4 Large Objects - Blocks Line of Sight - Destroyed when moved on to

11 DROPSITES							
Name	Scan	Sig	Hull	ES	KS	Other Notes	
Small Space Station	6	4	10	4+	4+	- Dropsite is Controlled if no enemy Battalions present and friendly Battalions present - Dropsite is Contested if enemy Battalions present and friendly Battalions present - Dropsite is Ruined if less than half Hull remain - Dropsite is Levelled if zero Hull remain - Dropsite uses best available Save including Features - For each Hull lost, remove a Battalion starting from features - For every 4 damage inflicted, the attacking player may instead remove a Feature and all Battalions assigned to it	
Medium Space Station	6	6	15	4+	4+		
Large Space Station	6	8	25	4+	4+		
Small City	6	0	10	5+	5+		
Medium City	6	0	15	5+	5+		
Large City	6	0	25	5+	5+		

11.3 Features										
Type		ES	KS	Weapon	Scan	Attack	Lock	Dmg	Type	Special
Military Outpost		3+	5+	Missile Halo	6	1	2+	2	K	Close Action, Escape Velocity
Orbital Defence Gun		5+	3+	Orbital Gun	6	3	3+	1	E	Burnthrough-1, Escape Velocity
Comms Station		5+	4+	Comms Uplink: If Player that controls the Dropsite generates 1AP						
Power Plant		4+	5+	Volatile: When Feature is destroyed Groups within 3" gain a Spike then inflict 2D3 damage to the Dropsite						
Hanger		4+	4+	Load: Fighters & Bombers Launch: 2						

4.2.1.1 Player Core Abilities	
Cost	Effect
*	AP Re-roll: Once per Group, Asset, or Dropsite activation, after you roll any dice, you can re-roll any number of those dice. You may re-roll multiple dice in a single roll this way but must re-roll at least one dice, spending 1AP for each dice re-rolled
2	Brace for Impact: When a player would roll for Crippling Effects, instead of rolling, make the result of a Crippling Effect roll a 4.
2	Contain Reactor: When a player would roll for Explosion, instead of rolling, make the result of an Explosion roll (for you or your opponent) a 2.
2	Time to Target: After moving a Wing of your Fighters or Bombers, you may move that Wing a second time with a Thrust of 6" in any direction. The Wing cannot divide into smaller Wings or form/be formed into larger Wings due to this additional movement.

OBJECTIVES						
Normal / Demolish				Focal		
Control/		Contest/		3VP / 1VP if ≥ half value		
Levelled		Ruined		High Low		
Small	2VP	OVP		Light	1	0
Medium	3VP	1VP		Medium	4	1
Large	4VP	2VP		Heavy	7	3
Kill Points 2VP/500PTS				Colossal	11	5
Assess While on General Quarters, any Capital Ship within 6" of a Scenario Dropsite may choose to Assess that Dropsite before or after its movement. If it does, it cannot attack and cannot launch assets. Each Dropsite can only be Assessed by each player once and each Dropsite Assessed awards the Assessing player 1VP						

Select Asset Summary							
UCM Load	Thrust	Attack	Lock	Dmg	Type	Reroll	Special
Light Torpedo	6	4	2+	1	K		Penetrator
Medium Torpedo	6	4	2+	2	K		Penetrator
Heavy Torpedo	4	4	2+	4	K		Penetrator
Bombers	10	2	3+	1	K		
Heavy Bombers	8	2	3+	1	K		Calibre-H/C, Penetrator
Mines	4	2	2+	2	K		
Fighters	13					1	
Scourge Load	Thrust	Attack	Lock	Dmg	Type	Reroll	Special
Torpedo	8	6	4+	1	K		Corruptor-2, Crippling-Fire
Bombers	12	2	3+	1	K		Crippling-Fire*
Mines	6	3	4+	1	K		Corruptor-1
Fighters	12					2	
PHR Load	Thrust	Attack	Lock	Dmg	Type	Reroll	Special
Torpedo	6	4	2+	2	K		Penetrator
Bombers	9	2	2+	1	K		
Mines	4	2	2+	2	K		
Fighters	12					2	
Shaltari Load	Thrust	Attack	Lock	Dmg	Type	Reroll	Special
Torpedo	6	3	4+	3	C		Flash-2
Bombers	13	2	3+	1	E		
Fire Ships	7	4	5+	1	K		
Mines	6	4	3+	1	E		
Impel Mines	6	3	4+	1	E		Arrest-4, Impel-1
Fighters						1	
Resistance Load	Thrust	Attack	Lock	Dmg	Type	Reroll	Special
Torpedo	6	6	2+	1	K		Penetrator
Bombers	10	3	4+	1	K		
Fire Ships	3	3	2+	1	E		When Load shared with Bulk Landers, 2 Launch are needed to place 1 Fire Ship
Mines	3	5	4+	1	K		
Fighters	16					3	
Biofiercer Load	Thrust	Attack	Lock	Dmg	Type	Reroll	Special
Torpedo	12	3	2+	1	K		Corruptor-2, Remove Asset during Clean Up Step of End Phase
Bombers	13	3	4+	1	K		
Mines	5	4	3+	1	K		
Fighters	16					1	

14.1 Ship Special Rules Summary
14.1.1 Aegis-X All Ships with this rule in a Group combine their X values into a single value, Y. Friendly Groups in coherency within 6” of a Ship with this rule and the same Orbital Layer (including its own Group) gain the benefits of Aegis. When rolling saves against Close Action and Bomber (of any type) attacks, those Groups gain Y additional save dice they may add to those saves. Before rolling to save, the defending player assigns these dice against specific weapons, divided up as they choose (including any modified hits). An Aegis Group can only grant the benefits of Aegis once each time a friendly group is attacked. A friendly Group can only benefit from Aegis from one Group each time it is attacked.
14.1.5 Detector If this Ship is on an order that allows it to attack, this Ship may forgo one allowed Weapon use during its activation. If it does, at the end of its activation place two Spikes on an enemy Group in line of sight. A Group that uses Detector gains a Spike
14.1.6 Escort After Weapons have been assigned to a friendly Ship of H or C tonnage within 6” of this Ship on the same Orbital Layer, you may declare the use of Escort for the friendly Ship. Only one Group may Escort at a time and it must be in Coherency. After your opponent rolls to hit the original target, allocate an amount of hits from that roll to this Group. An Escort Group cannot be allocated more damage by those hits than each remaining Ship in it has in starting Hull. You may use this even if the Escort Group is out of range, arc, and line of sight of the attacking Group. Continue the attack sequence using the Escort Group. Weapons with the Focused rule cannot be affected by the Escort rule.
14.1.7 Gateship-X Shaltari Motherships must launch their Dropships via a Ship with this rule. Each Ship with Gateship can have up to X Dropships deployed from it each round. Note: though the launch is measured from the Ship with the Gateship rule, it is the Mothership that is launching. When this Ship goes on the Weapons Free, Max Thrust, or Damage Control orders, it reduces its Gateship-X value to 0 until the start of its next activation.
14.1.10 Mothership Shaltari Motherships must launch their Dropships via a Ship/Dropship with this rule (sometimes referred to as Gateships). Each Gateship can have up to X Dropships deployed from it each round. Note: though the launch is measured from the Gateship, it is the Mothership that is launching. When this Ship goes on the Weapons Free, Max Thrust, or Damage Control orders, it reduces its Gateship-X value to 0 until the start of its next activation.
14.1.11 Payload S/L-X During the Porter Ship’s activation, if it is on an Order that allows it to Launch, you may detach one or more of its Payload Ships and place them within 3” of it. In the round they are detached, these Payloads activate together immediately as part of the Porter Ship’s activation after it has completed its Order. In subsequent rounds, all your Payload Ships count as being part of a single Group. Crippling Effects, Spikes, and other rules that affect an entire Group only affect the targeted Payload Ship. Payload Ships always follow General Quarters Orders, even if its Porter is on different Orders. Payload Ships ignore Coherency rules (and do not gain Formation Benefits), have no Lead Ship, are targeted by attacks individually, and these attacks can only damage the targeted Payload Ship. If a Payload Ship is attached to a Porter Ship when that Ship is destroyed, the Payload Ship is destroyed.
14.1.12 Porter S/L-X This Ship may be assigned Payload Ships with the same letter up to a total capacity of X. During a Porter’s activation, it may attach any detached Payload Ships within 3” if it has available capacity. Payload Ships reattached to a Porter Ship are removed from the table to be deployed in a later round. Any tokens, Spikes, or effects affecting the reattached Payload Ship are removed from that Ship.
14.1.16 Shield-X This Group has a Shield Save of X+. After Weapons have been assigned to this Group or Assets attack this Group, you may declare the use of Shield Saves for this Group. If you do, this Group replaces its Energy and Kinetic Saves with their Shield Saves for that attack sequence. Shield Saves can be used against Energy, Kinetic, and Core damage and ignore any modifiers to Energy and Kinetic Saves. Backup Saves may then be used after Shield Saves as normal. A Group gains a single Spike each time it uses its Shield saves (regardless of the number of saves made per use). Hits caused by Boarding Actions cannot be saved by Shield Saves.
14.1.20 Impetuous At the start of each round, friendly Groups with this rule improve the Lock of their Weapon Systems by 1 until you activate a friendly Group without this rule.

14.2 Weapon Special Rules Summary
14.2.6 Bombardment This Weapon ignores the penalties for attacking Cities and Ships in Atmosphere. Improve the Lock of this Weapon by 2 when attacking Cities. When attacking a Ship in Orbit with this weapon, it always hits on a 6+ and can never cause a critical. This weapon cannot be used to attack Ships in Orbit while the attacking Ship is in Atmosphere
14.2.7 Burnthrough-X Each of this Weapon’s critical hits reduces the target’s Energy/Kinetic Save by X for hits caused by this Weapon for this attack. Saves made for other Weapons are unaffected. Roll attacks separately for each Burnthrough Weapon.
14.2.8 Calibre-X Improve the Lock value of this Weapon by 1 when attacking Groups of any of the listed X Tonnage values.
14.2.9 Close Action This Weapon may only be fired at targets within Scan range and on the same Orbital Layer as the attacking Ship.
14.2.10 Corruptor-X When this Weapon successfully inflicts damage, place X Battalions on the target.
14.2.12 Critical-X Each of this Weapon’s criticals increases the damage of that hit by X.
14.2.14 Flash-X When this Weapon inflicts damage, the damaged Group (or Ship if it ignores the usual coherency rules) gains X Spikes.
14.2.13 Escape Velocity This weapon ignores the penalty for attacking Ships in Orbit and treats all Ships in Atmosphere as non-Descent Ships, so only reduces its Lock by 1 when attacking Ships in Atmosphere. Close Action weapons with this special rule may be used against targets in Orbit while the attacking Ship is in Atmosphere.
14.2.15 Focused Instead of the normal potential targets for Weapons, this Weapon’s potential targets are either: • A single enemy Ship. • A Dropship containing no friendly Battalions. Damage caused by this Weapon is allocated to only the targeted Ship.
14.2.16 Fusillade-X This Weapon increases its Attack value by X while its Ship is on Weapons Free.
14.2.23 Overcharge Before assigning Weapons to targets, you may double the Damage value of this Weapon. If you do, this becomes a High-Power Weapon for this activation and each attack roll of 6 causes that attacking Ship to lose this Weapon’s unmodified Damage value in hull points. Only one Weapon per Ship may benefit from this rule per activation.
14.2.26 Scald-X If this weapon attacks a target within Scan range, reduce the target’s Energy/Kinetic save against this weapon’s attack
14.2.29 Volley-X This Weapon counts as 1 Weapon for Orders purposes. When you assign this Weapon to a target, you assign it to targets up to X times (either the same or different). Once assigned, treat each separate allocation as a separate Weapon profile for the subsequent steps in the attack sequence. Broadside Weapons using Volley must alternate arcs when determining and assigning targets
14.2.30 Reave-X Each of this Weapon’s criticals reduces the Energy/Kinetic save used against that hit by X
14.2.20 Linked-X Weapons with the same Linked-X value on the same Ship count as 1 Weapon for Orders purposes. When you attack with a Linked-X Weapon, you attack with all other Weapons on that Ship with the same Linked-X value.
14.2.27 Status When you hit with this Weapon, pick one of the following tokens; Defence Systems Offline, Scanners Offline, or Navigation Offline.
14.2.31 Anti Wing This weapon may target enemy Wings as if they were Ships (with a Sig of 0”) but reduces its Lock value by 1 for that attack. If it does, for each hit, remove 1 Fighter or 1 Bomber from that Wing or any other enemy Wing within 3” of the target.
